GEORGIA EPD CHECKLIST FOR IN USE TO TEMPORARILY OUT OF USE USTS

Facility ID / Location ID: _____

County: _____

- [Form 7530 – Notification Data for Underground Storage Tank](#)
- Invoice or Work Order Showing Tanks Are Emptied to Less Than One (1) Inch
- Work Order or Pictures Showing All Risers Are Fitted with a Securing Cap
- Work Order or Pictures Showing All Vent Lines Are Open and Functioning
- Cathodic Protection Status (Select One):
 - Cathodic Protection Test Conducted Within Past 24 Months (Only If Tanks Are Steel)
 - Rectifier Log (Only if Impressed Current Tanks)
 - Not Applicable (Only If Tanks Are Not Steel)

Please remember that Temporarily Out of Use facilities must still perform Annual Tank Registration, maintain Operator A/B certification, continue Cathodic Protection Testing every 3 years if the tanks are steel, and record a Rectifier Log every 60 days if the tanks are steel-impressed current. A Phase II report will be required if the facility is Temporarily Out of Use for more than 12 months. If a rectifier for impressed current is not functional for more than 12 months, the tanks must be permanently closed.
