- ◆ Small Business Environmental Assistance Program (Teresa Shiflett, [teresa.shiflett@dnr.ga.gov](mailto:teresa.shiflett@dnr.ga.gov) 404-675-1819)

- Conduct inspections of stationary sources of air pollution (includes combustion, chemical, mineral and VOC sources)
- Enforce Air Quality Control Rules for combustion, chemical, mineral, and VOC sources
- Ensure that sources of air toxics are in compliance with air toxics rules
- Respond to citizen complaints about air quality problems
- Specify, approve and audit stationary source emissions monitoring and testing procedures and reports
- Small Business assistance on air issues
- Review Risk Management Plans and perform inspections under Sec. 112(r) of the Clean Air Act (CAA)

## ECO-TIPS – for Georgia's Environment

### TO IMPROVE OUR AIR AND REDUCE GLOBAL WARMING:

- ◆ Car pool, van pool, use transit, telework, bike or walk when possible. Cars are the largest cause of our air pollution in most urban areas of Georgia. When you do use your car, plan ahead and combine trips and errands. If you are buying a new car choose a fuel efficient and low emitting model.
- ◆ Properly maintain your vehicle and keep tires properly inflated.
- ◆ Limit idling when possible, avoid quick starts and drive within the speed limit.
- ◆ Refuel cars after 6:00 pm to limit daytime pollution releases and don't top off your tank.
- ◆ Keep lawn equipment and boats tuned up. Do not use lawn mowers and other gas powered lawn tools on a smog alert day, or use electric tools instead.
- ◆ Use electric or natural gas grills instead of charcoal and lighter fluids.
- ◆ Use environmentally-safe paints and cleaning products. Delay use of oil-based paints until after 6:00 pm or after smog season.
- ◆ Conserve energy and turn off lights when you aren't using them. Set air conditioners to 78°F or higher or use a fan when possible. When buying a new appliance, think of buying one that is energy efficient. Remember most of the energy we use comes from the burning of fuel. The more energy efficient we are, the less we pollute.

### TO CONSERVE OUR WATER AND PREVENT POLLUTION OF RIVERS & STREAMS:

- ◆ Install ultra low-flow plumbing devices and fixtures. Replace worn out washers on leaky faucets.
- ◆ Take shorter showers. Five minutes or less is probably adequate.
- ◆ Do not use the toilet as a trash can. Each flush uses about 5 gallons.
- ◆ Turn the water off while shaving or brushing teeth. Don't let it run while you're washing your car.
- ◆ Replace leaky toilet valves (a "running toilet" between flushes). You may be losing more than 250 gallons a day.
- ◆ Wash only full loads of clothes and dishes.
- ◆ Don't run the tap to get a cool glass of water.
- ◆ Minimize lawn and garden watering. Water trees, lawns and shrubs slowly to prevent runoff.
- ◆ Participate in a cleanup event (annual river cleanup held each October) or local Adopt-A-Stream program. For information call 1-888-373-5947 (toll free).
- ◆ Buy household products labeled non-toxic, non-phosphorous or water-soluble. Toxic chemicals can harm stream life. Phosphorous can promote excessive growth of weeds and algae.
- ◆ Dispose of trash properly. Styrofoam and plastics can kill fish and wildlife and contaminate water sources.
- ◆ Inspect septic tank system annually. Pump it out every 3-5 years.
- ◆ Do not dispose of solvents, hazardous chemicals or waste in storm or home drains.
- ◆ Use pesticides, herbicides, and fertilizers carefully and sparingly and only when other methods have failed. Do not apply if rain is in the forecast. Remember, anything entering a storm drain goes directly into streams, untreated.
- ◆ When watering lawn and garden, divert garden hoses from paved surfaces onto grass.
- ◆ Do not dump used motor oil or antifreeze down storm drains. Take used motor oil and antifreeze to designated recycling centers.
- ◆ Have your car inspected and maintained regularly. Leakage of fluids will eventually reach the nearest stream.
- ◆ Report any suspicious potential pollutant discharge or illegal dumping activity. Call 1-800-241-4113 (toll free).

### TO PROTECT OUR LAND RESOURCES:

- ◆ Choose products and containers that are recyclable. Participate in a community recycling drive or curbside program.
- ◆ Reuse or recycle newspaper, boxes, brown paper bags, packaging peanuts and other packaging materials. Wash and reuse glass and plastic jugs, coffee cans and dairy tubs.
- ◆ Reduce the amount of unnecessary packaging. Buy products that are reusable or packaged in bulk, or buy the large economy size.
- ◆ When possible use rechargeable batteries. This practice will help eliminate toxic metals in soil and ground water.
- ◆ Make sure your vehicle is well maintained and isn't leaking any fluids. Petroleum products can contaminate the soil and ground water.
- ◆ Try using natural household cleansers, such as soap & water, instead of chemical cleansers. If you do need to use products with hazardous components, follow instructions carefully. Any unused portion can be shared with neighbors or donated to businesses and charities or recycled. Do not pour them down the drain or on the ground.
- ◆ Maintain and repair durable products and keep appliances in good working order. Buy high-quality, long-lasting tires, and follow maintenance procedures. This will extend tire life and reduce tire waste.
- ◆ Leave mowed grass clippings on the lawn to decompose and add nutrients to the soil. Start a compost pile with leaves, grass and shrub clippings, and some non-meat food scraps.
