Dear Ms. Futch,

On behalf of Ashland Inc. (Ashland), EHS Support LLC (EHS Support) prepared this letter to notify you the next semi-annual progress report will be combined with the forthcoming Groundwater Corrective Action Work Plan due January 28, 2016. Remediation activities completed during this reporting period (September 1 through December 2015) were limited to confirmation sampling of newly installed monitoring wells MW-23A/B and MW-24C. Initial results were provided to the State electronically on October 26, 2015.

We are in receipt of the State's comment letter dated December 17, 2015 approving groundwater delineation activities for the project site. We would like to thank the State for its assistance in achieving this important remedial goal. The forthcoming groundwater corrective action work plan will outline the proposed remedies to address known impacted properties.
