Roy Walton
General Manager
Waste Industries – Taylor County Landfill
Mauk, Georgia 31058

**SUBJECT: Taylor County – Waste Industries Taylor County Landfill
Permit Number 133-003D(SL)
CCR Management Plan - Approval**

Dear Mr. Walton:

The Georgia Environmental Protection Division (EPD) received your *Request for Minor Modification to Solid Waste Handling Permit* (Minor Modification) to adopt a Coal Combustion Residuals (CCR) Management Plan on March 24, 2017, with revisions on May 19, 2017. EPD has also received the corresponding modification to the site's groundwater monitoring plans. The requests are hereby approved.

The approved CCR Management Plan is now part of the facility's Design and Operational Plan, and is therefore made part of your Solid Waste Handling Permit. Operating in compliance with the Permit with respect to CCR management requires strict adherence to the procedures of the approved Plan and requires that CCR received at the facility does not differ from that described in the Plan and is not received in amounts that exceed that given in the Plan.

Under the plan approved today, this facility may receive CCR for one year. An updated CCR Management Plan must be received no later than March 1, 2018 and incorporated into your D&O Plan in no less than one year or you must cease receipt of CCR on May 21, 2018.

EPD is returning approved Design and Operational Plan sheets with this approval letter. One copy of plans will be retained here, and one sent to the West Central District office, for EPD's files. If you have any questions regarding this letter, please contact Chad Hall at (404) 362-4893.

Sincerely,

Chad Hall, PhD, PE
Manager

Industrial & Municipal Solid Waste Unit
