CLOSURE PLAN

The closure plan describes the steps necessary to close the disposal facility. Initial steps include removing the disposal operations, followed by the post-closure period. This is a crucial step in ensuring the facility is safe and secure for future use.

POST-CLOSURE CARE

The post-closure care plan details steps that will be taken for the next 30 years after closure to prevent any potential threats to human health and the environment. This includes the treatment and cleanup of any remaining waste if necessary.

ANNUAL POST-CLOSURE COST ESTIMATE

The annual post-closure cost estimate includes the costs associated with maintaining the facility for the next 30 years. This is vital for ensuring that the facility remains safe and secure for future generations.

CONCLUSION

In conclusion, the post-closure plan is a critical component of the overall facility management plan. It ensures that the facility is properly closed and maintained to protect human health and the environment.
